

Segregation

1. SuperAdmin (Managable)
2. Franchise
3. Partners

Partners:

1. Simplified Information (Too much information)
2. Add counserlor view
3. Lead view, (Add proper lead source tracking)

Make sure Lead, Student, Application in all one.

Access:

Email Template: Could make email template and send and broadcast

Communication:

Email and whatsapp and other conversation all in one.

Partners:

Add feature from them where they can see our announcements like pdf and so on

Dashbaord should be moved to AI and reports and then Add

Invoice:

Admin to partner to Admin(Invoice)

Partner can select service:

Service requests like feature, csca class and so on

Ticket Raising System:

Think about partner view: slack ocommuntiation to dashboard

Franchise: Add their user, track what their user are doing, their analytics like which program revenue student flow, , cost analysis

Feature Reqeust

1. Documentation:

Member ship update liek we have certification generation now update.

For patners add hot progarms which program to push.

Dashboard lead for franchise(Region wise)

Student at risk.if click they should get all the information

Book a appointment link for the partner.

Gamification:

Partner Level both for partner and franchise. , if certain criteria meet then we will provide them scholarships.

Superadmin view that is our view/

Program review feature.

University at risk,

Full Tracking Application system from which university student is going, where to push

Our system are not seeing what our team are doing when student status are different more better status tracking

Facing problem of how many student are in any university which is harder that track

Automated message more controlled by the team,
